Runners:
The metal runner is not available for the ottomans for manufacturing processes. We assemble visually matching legs instead of the runner at the front of the enlarged seat at the longchairs KF 06/07 and KF 0N/07N respectively.

Leg and seat heights:
Concerning both of the available leg heights, the model is available in different seat and back heights. The leg design has to be indicated.

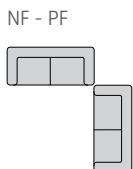

Castors for ottomans:
All of the ottomans as well as the lounger KM are available with casters for additional charge. The article number is marked with an additional "R" (G 004R for example). Two of the casters can be fixed. Please also note, that the casters are available in two different heights and these do not correspond to the heights of the legs (F 6R and F 7R = 12,5 cm). In case of using casters the desired seat height will be reached by a special model. We are assembling the plastic casters F 60 with a height of 5 cm at the

ottoman GF 004 instead of the metal casters with 13 cm.

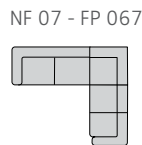

Casters for the lounger KM:
The lounger KM is also available with casters in two different heights.

Leg colours:
The wooden legs are available in different stain tones and gloss paint as desired (have a look at the opening credits, page 7).

CHARACTERISTICS

Flexible arm parts

The arm parts are step-by-step foldable as standard.

The arm parts change into a comfortable headrest by simply folding them up.

Ottoman

The width of the ottoman GF 004 is raiseable up to 167 cm. There is a huge storage capacity under the seating surface. With the intermediate table UG 004 the ottoman changes

into a table. It can be additionally ordered optional. Ottomans with function do not have inner springs in the seat. The wooden board of the intermediate table is available in different stain tones and gloss paint, please indicate the preferred wood colour when ordering - see the opening credits at page 7).

ORDER CHECKLIST:

Remembered everything?

- Compilation and cover
- Leg design, leg height
- Leg colour for wooden legs
- Colour for the intermediate table
- UG 004
- Casters for ottomans and lounge KM
- Compilation sketch
- Contrast thread
- Offset seam
- Cushions
- Storage place for the ottomans (see specifics)

Well-matching to »taboo« – the single armchair »havana« № 11581.

Order information

Back parts:

All parts are equipped with the relevant original covering in the back.

Flexible arm parts:

A maximum load-bearing capacity up to 25 kg is guaranteed for the flexible arm parts with step-by-step function. They are no seating accommodation.

Recommended ottoman:

GF 065 – extending ottoman with flexible step-by-step function at the right (in connection with KF 07 and PF 06), to form a rectangular lie-flat surface. And GF 075 – extending ottoman with flexible step-by-step function at the left (in connection with KF 06 and PF 07) respectively. The ottoman can also be placed separately.

Planning sketch:

Owing to the many variation possibilities, please send a planning sketch with your order. At the type plan, we have red-marked the connecting sides at the articles KF 06/07, KF 06N/07N, EG 06/07 and FP 067/076 for you.

Connecting sides:

The connecting sides are available in original covering instead of lining against additional charge. See prizes at the opening credits, page 6).

Seam appearance:

Decorative stitching, flat-fell seams or double seams can look differently with the quality in material and leather. Manufacturing-related seams can be dropped or replaced by simple seams.

Contrast thread:

With some leather colours this model is available with a different coloured contrast thread. This is without additional charge and for request. Possible colours are shown at the bract spec of the individual leather quality at our cloth-/leather trolley. Please always give us the contrast stitch number, otherwise we will deliver tone in tone.

Recommendation:

As an occasional furniture we recommend the tables from model series 10012. As storage place for the ottomans G 003 and G 004 we recommend the plexiglas cover L 009 or a matt from the model series 10006.

Every stated measure is approximately and in centimetres. Subject to change. The measures are shown as follows: width/depth/height/seat height.

standard seat depth: 59 cm
 seat depth for elements marked with „L“: 69 cm
 width of an arm part: 41 cm
 KM, lounge with back support function:
 height 41 cm, if back is up: 77 cm
 KF06/07, long chair with arm part function:
 width 96 cm, if arm part is folded out: 116 cm

Forming of waves:

Cloth and leather are stretching more or less under usage. For that reason, folds can occur at the cover. This optical changing does not influence the usage, function and life span of the furniture and is no material deficiency.
