

Fabric W71

These materials are elegant flat fabrics.

Product width: approx. 140 cm

Abrasion cycles: as per RAL 430/4 for working on upholstered furniture

Composition: NS: 38% viscose, 36% polyester, 26% cotton
GS: 38% viscose, 36% polyester, 26% cotton

Scrub resistance: ★★

Rub fastness (colour wear): ★★

Light fastness: ★★★

Pilling behaviour: ★★

Right reserved to make structural and colour changes!

Care and cleaning: with commercially available products

Characteristics typical of the product:

- Although warp and weft are colour-coordinated in this fabric, visible colour changes may occur, especially with contrasting colours/stripes at the seams. However, these changes will not affect the fabric's durability and suitability for use, but should be regarded as a characteristic property of this covering.
- Every flat woven fabric will become roughened during use.
- Irregular article structure, e.g. concentration of threads, nodules etc.
- Seat shine is unavoidable.
- Loops caused by catching on sharp objects or Velcro strip are to be expected.
- Pilling is unavoidable and can be caused by the adherence of clothing and other textile fibres.
- Nap changes (seat shine/shiny areas) are unavoidable with all chenille fabric.

Caution: Discolouration caused by textiles are excluded from every manufacturer warranty.

This is not a fault in the material, but a defect in the clothing material. The complaint should be addressed to the clothing store where the article was purchased. The „polluter pays“ is the principle that applies here.

★★★ very good, ★★ good
